Full-Stack Web and Cross-Platform Mobile Developer with 3 years of experience across internships, professional engagements, and freelance projects. Experienced in developing web applications, mobile apps, RESTful APIs, and business management systems for government and private-sector clients. Skilled in building secure, role-based applications that translate complex business requirements into practical, reliable, and user-friendly solutions. Contributed to projects including Civic Eye and a Code Enforcement Management System, with a focus on clean, maintainable code, system reliability, and effective collaboration throughout the software development lifecycle.

Education

Dire Dawa University Jan 2021 - Jan 2025
B.Sc. Software Engineering
Earned a B.Sc. in Software Engineering, applying software development principles to academic and practical projects.

Developed strong foundations in algorithms, database engineering, system design, and software architecture.

Applied engineering knowledge through software development projects and collaborative problem-solving.

Professional Experience

Fullstack Developer (Freelance) Mar 2026 - Aug 2026
Addis Ababa City Administration, Innovation & Technology Development Bureau | Addis Ababa, Ethiopia

- Designed and delivered Civic Eye, a community-driven public infrastructure reporting platform built on an evidence-first, trust-based model enabling citizens to report and validate local problems with photo and geolocation evidence.
- Built a secure multi-role system for citizens, moderators, and city administrators using Laravel, Vue.js, PostgreSQL, and a RESTful API backend.

- Collaborated directly with city officials to align the platform with real government workflows; awarded an official freelance completion letter upon delivery.

Software Engineering Intern Mar 2026 - Sep 2026
Qelem Meda Technologies | Addis Ababa, Ethiopia

- Contributed production-level fullstack features across multiple client projects using React.js, Node.js, and PostgreSQL in an agile team environment.
- Participated in sprint planning, code reviews, and technical documentation, consistently delivering maintainable code under project deadlines.
- Completed the full structured internship programme and received a formal completion certificate and recommendation letter.

Fullstack Developer (Freelance) Jan 2024 - Jan 2025
Fanos Tech P.L.C | Addis Ababa, Ethiopia

- Built the Code Enforcement Management System for the Addis Ababa city government, a Laravel and Filament platform digitizing urban rule-violation tracking and public awareness campaigns.
- Implemented secure, role-based data flows and full audit trails, translating complex government operational workflows into a reliable digital solution.
- Awarded a recommendation letter following successful project handover and client acceptance.

Software Engineering Intern Sep 2025 - Jan 2026
Zemenay Tech | Addis Ababa, Ethiopia

- Developed frontend and backend features for client-facing web applications using React.js and Node.js within an agile development team.
- Engaged in daily standups, sprint retrospectives, and peer code reviews, building strong collaborative engineering habits.
- Completed the internship programme and received both a completion certificate and a formal recommendation letter.

Technical Skills

Languages
JavaScript, TypeScript, PHP, Python, HTML5, CSS3, SQL

Frontend
React.js, Next.js, Vue.js, React Native, Bootstrap, Redux Toolkit

Backend
Node.js, NestJS, Laravel, Django, Flask, REST APIs

Databases
PostgreSQL (standard and Neon serverless), MySQL, MongoDB, Firestore

DevOps & Deployment
Docker, CI/CD pipelines, Firebase, IIS

Tools
Git, Postman, Visual Studio Code, Filament, OpenCV

AI-Assisted Development
Claude AI, Antigravity, Codex

Projects

***Face Recognition**-Based Attendance System*
Developed a biometric attendance management system that automates employee attendance using facial recognition.

Implemented identification of registered employees and automatic attendance recording, with an administrative dashboard for employee management, attendance monitoring, and report generation.

Designed to reduce manual errors and prevent attendance fraud.

***Civic Eye —** Public Awareness & Issue Discovery Platform | Addis Ababa City Administration*
Built a community-driven infrastructure reporting platform allowing citizens to report and validate issues with roads, utilities, and public spaces using photo and geolocation evidence.

Delivered a secure role-based moderation dashboard for administrators to review, approve, or escalate reported issues.

***Lib le Lib** — Privacy-First HIV Support Platform*
Built a privacy-first mobile support and connection platform for people living with HIV, featuring confidential medical verification before entry.

Delivered iOS and Android applications plus an admin web dashboard with strict data security controls.

Multi-Vendor Food Delivery Platform
Developed a multi-role system connecting customers, drivers, and restaurant managers with real-time order tracking and in-app messaging.

Implemented push notifications via Node.js cloud functions and managed frontend state with Redux Toolkit.

Code Enforcement Management System
Built a government platform digitizing urban code enforcement for Addis Ababa, tracking illegal construction violations and managing public awareness campaigns.

Implemented secure role-based access control and full audit trails.

Certifications

Internship Completion Certificate Mar 2026 - Sep 2026
Qelem Meda Technologies

Freelance Completion Letter Jan 2026 - Aug 2026
Addis Ababa City Administration, Innovation & Technology Development Bureau

Internship Completion Certificate Sep 2025 - Jan 2026
Zemenay Tech

Recommendation Letter
Fanos Tech P.L.C Jan 2024 - Jan 2025

More than 5 Hachathon Certefications

Additional Information

Languages: English (Professional working proficiency), Amharic (Native)

Core Strengths: Problem solving,
Clear communication,
Team collaboration,
Time management,
Adaptability, Attention to detail, Continuous learning

Interests: Freelancing and open source projects, AI-assisted software development
